Microsoft journey to Open Source

It's been a journey...

The Market is Embracing Our Transformation

"I know way too many Linux users who think of Microsoft as 'The Evil Empire.' People, that was yesterday. Get over it...Look at Microsoft in 2016 and you'll see a company which offers the open-source Hadoop big data software on Ubuntu and whose CEO proclaims that Microsoft loves Linux."

Steven J. Vaughan-Nichols

"Seeing the words 'Microsoft' and 'Linux' together in a single sentence may still come as a shock to a few people, but Microsoft says more than 60 percent of images in the Azure Marketplace are now Linux-based."

Frederic Lardinois

"The new Microsoft has taken bold new steps and has been on a path to partner with its fiercest rivals of past years. Strategically, this is what is required to be a player at scale in the cloud platform wars."

AI Hilwa, IDC

"[The Red Hat partnership is] a testament to Microsoft's ability to rise above product competitiveness and be open, especially when it comes to Azure."

Eli Khnaser, Gartner

"The new Microsoft Certified Solutions Associate Linux on Azure certification <...> It's something of a surprising move, considering that Azure didn't even support Linux virtual machines four years ago, but meshes with Microsoft's current strategy of embracing open source technologies."

Blair Hanley Frank

"Even Microsoft, long viewed as the enemy of open-source development, has focused on making its Azure cloud computing platform a hospitable place for open-source software, including different flavors of the Linux operating system."

Barb Darrow

HD Insight managed service on Linux

Acquisition

Run Linux on Windows natively

60% of all images in Azure Marketplace are based on Linux/OSS

1 out of 3 VMs on Azure run Linux, and more than half of all new VMs run Linux

1 out of 3

Partnership

Jenkins

Jenkins project on Azure

Microsoft joins Eclipse Foundation

Platform Services

Security & Management

-  Service Creation & Configuration
-  User/Group Directory Store
-  Identity Sign-up and sign-in
-  Multi-Factor Authentication
-  Scheduled Service Management
-  Task Scheduler
-  Encryption Key Store
-  Software/Solution Marketplace
-  Pre-Build VM Images

Services Compute

-  Stateless Compute
-  Distributed Compute
-  Scheduled Compute Jobs
-  Virtual App Streaming

Integration

-  Simple Queuing
-  B2B Integration
-  Hybrid Connections
-  Pub/Sub Queuing

Media & CDN

-  Live & OD Media Streaming
-  Content Delivery Network (CDN)

Web and Mobile

-  Web Apps Infrastructure
-  API App Infrastructure
-  Mobile Backends
-  Business Process Automation
-  API Management
-  Push Notifications

Developer Services

-  Development Tools
-  Software Development Kits
-  Software Lifecycle Management
-  Application Instrumentation

Data

-  Relational SQL Database
-  Data Warehouse
-  Document Database Service
-  Distributed In-Memory Cache
-  Search
-  Simple Key/Value Store

Analytics & IoT

-  Big Data Analytics
-  Predictive Analytics
-  Data Stream Analytics
-  Big Data Storage
-  Data Pipelines
-  Device Data Collection
-  Data Source Management
-  IoT Device Management
-  Mobile Analytics

Hybrid Operations

-  Directory Health Monitoring
-  Privileged Identity Management
-  Domain Join & Policy Management
-  Server Data Backup
-  Operational Analytics
-  Bulk Data Import And Export
-  Disaster Recovery
-  Hybrid/Intelligent Data Backup

Infrastructure Services

OS/Server Compute

-  Virtual Servers
-  Containers

Storage

-  Disk based Object/File Storage
-  Shared Storage
-  SSD based Object/File Storage

Networking

-  Virtual Network
-  VM Load Balancer
-  DNS
-  Direct Network Connections
-  Traffic Distribution
-  VPN Gateway
-  HTTP Load Balancer

Datacenter Infrastructure (34 Regions, more than any other cloud provider)

Our approach to open source in the cloud

Enable

An open and flexible platform that meets you where you are and adds value to your existing investments

Integrate

Embracing leading ecosystems, increase agility and offer consistent open source offerings

Release

Support a strong ecosystem to achieve more through Microsoft's own portfolio investments

Contribute

Extend the community and reach to more people, and partner for first-class experiences

Build on the infrastructure

Lift-and-shift + net new on Linux Docker

Build on the platform

Cloud-born LOB

Azure Open Source Data Platform

Stakeholders

DBAs and data scientists

Operations

Developers

Business

Relational

Collective set of multiple data sets organized by tables, records and columns

NoSQL & Cache

Non-relational DBs where data is modelled in means other than the tabular relations used in relational databases

Big Data

Accept data at a very high velocity, and store structured and unstructured data in an efficient and scalable way across nodes

Leverage cloud infrastructure

Dev/Test, Production and Lift & Shift Docker, incl. via DC/OS

Relational

Azure SQL Database including revamped client driver support for PHP, Node.js, Java, Linux ODBC and more

NoSQL & Cache

Azure DocumentDB, including native MongoDB wire protocol support, and Redis Cache

Big Data

Azure HDInsight – full Hadoop solution available as a service on Windows and Linux

Build rapidly and connect to the platform

THREE REASONS INVESTORS LIKE MICROSOFT RIGHT NOW

▼ 1. IT'S AN OPEN COMPANY.

With Nadella at the helm, Microsoft is more willing to work with the rest of the technology industry than in years past. That keeps it from being an old-guard "stack" vendor and makes it a major player in the broader tech ecosystem.

▼ 2. IT'S ALL IN ON THE CLOUD.

Cloud computing is considered a massive growth opportunity for the entire tech industry. Thanks to savvy prior investments in infrastructure and services, Microsoft has the global scale and know-how to win big.

▼ 3. IT'S GOT A HYBRID STRATEGY.

"Hybrid cloud," that is. Most companies won't want to put all of their data in the public cloud. Most won't want to store it all privately, either. Microsoft is well-positioned with assets that serve clients in both places.

- Andrew Nusca,

Thank You!
